

# Water Network Upgrades - Te Mato Vai

## What's happening?

Local company Landholdings Limited is upgrading the public water supply ring main.

Before Landholdings can upgrade the pipeline, we need to provide temporary water connections for all properties connected to the existing main.

This means trial shutdowns of the existing main and monitoring for any loss of water supply or low water pressure. Please be prepared for disruptions to your current water supply.

The impacted area is Site D - from the Ara Tapu at Totokoitu Stream (Point U) to the junction of the Ara Metua and Ara Tapu at Paringaru Stream (Point T).

## When will this happen?

The trial shutdowns will start on approximately **Wednesday, 8 April** (weather permitting).

Site D ring main construction will commence after successful trial shutdowns, starting the week of **Monday, 13 April** (weather permitting).

## How will this affect you?

Your property may lose water or experience low water pressure during the trial shutdown.

## If you experience water issues during the trial, please contact To Tatou Vai:

Monday to Friday between 8am and 4:30pm: (682) 24479

After hours: (682) 52943

For the safety of our staff and community during the COVID-19 pandemic, we will not be hand-delivering letters to affected properties.

**Follow the Te Mato Vai and To Tatou Vai Facebook page(s) for regular project updates.**
